

Report about the activities in November in projekt »Animal Integration in the Educational Programme« ZORO

First of all welcome you all very much love the érdligeti elementary school and team project's behalf. I would like to convey the special greetings to Rita, who just did not come with us. I apologize for the poor angolomért, but I learned a long time ago in school. When I speak German, I would not be a problem, as a German teacher. But I will try my very best.

In the past month we have been very active. With Rita, we took part in the third Dogehtology Conference in Budapest.

As we participate in the Erasmus + »Animal Integration in the Education Programme 'proposal and the school has been going on animals or dogs and rabbits involving teaching, it is important for us to gain professional knowledge to assist our work in the school. This event provided an excellent opportunity for us.

The conference dealt with the following topics:

In their eyes or nose believe their dogs?

Why look at us?

What makes the irritating voice?

How to process the praise of their brains?

How does the robot development in the social behavior of dogs understand?

The experiments that were presented to us were very interesting and were encouraged to try out with the children as well.

The class 5a made with great enthusiasm to visit the animal clinic. Alison has been compiled based on the instructions of our questions.

1. How can determine if a dog is fed a healthy way?
- 2. How do I measure my dog?**
- 3. What tools do you need a veterinarian at the trial where the surgery?**
4. Equally important is the disinfection of animals, like humans?
- 5. How does a sterilizer?**
- 6. What should be borne by the physician and staff? There are strict**

**regulations?**

7. If accident animals, they also allow X-ray? How to recognize an X-ray of the body parts?

8. We know that it is now obligatory for the dogs of the chip. What is a chip scanner? What we read with her?

9. What are nursing facilities for the animals?

10. What are the animals most frequently visited by the animal clinic?

11. What you are sick?

12. Why did the castration of animals required?

13. If you want to pet a home, how to decide in what?

14. The projects aim to animals, in our case, dog and rabbit participate in the teaching hours and assist us in learning. What do you think about this doctor uncle?

All our questions were answered. The children were interested in everything. They had a great time. They made it an essay and drawings. A student in the words of David Smith to close my report: It was a great experience, other times I come willingly. Maybe someday I'll be a veterinarian.

We are glad that we can be partners in this project. Are you interested in doing our tasks and we are very interested in your experiences.

Thank you very much for your attention.
